ABOUT INVESTMENTS. There are no investments that are per-manently good but that yield a compara-

tively small income. The greater the pos-sibility of gain the greater the probability of loss. The more responsible the borrower and the more legitimate his use of money. the smaller the interest he pays.

Notwithstanding these facts there are thousands whose greed for 10, 15 and ever Common sense.

Hence it is that for absolutely safe invest-

ments there are none better than the Deben-ture Bonds and Real Estate Notes of this company.

The Debenture Bonds are issued in sums of \$100, \$500 and \$1,000, pay the investor

5 per cent and are payable semi-annually.
The Real Estate Notes are for sale at face value plus 1 per cent for commission. These pay 6 per cent interest per annum.

The company has money to loan upon approved real estate, stocks, bonds and similar urities at a low rate of interest.

Worth

Of tailoring is not necessarily found where prices are the highest. The question of price is one which is in the main governed by the expense account. High rents, &c., inevitably demand larger profits. It requires no argument to convince you of this logic. Our expense account is small—profits corresponding—natural result—lower prices than you are in the habitor paying.

It is they are making strong claims that even could a vote be secured on the anti-option bill it would be defeated in the Senate. They base their assertion upon the fact that the constitution of many of the southern Senators who heretofore favored the bill have changed their minds, owing to the raise in the price of cotton recently, and that they now have no inference of this kind. It seems almost certain that there is in the city.
